Professional Summary

Computer Science undergraduate with hands-on experience in software engineering, full-stack development, and AI-powered applications using the MERN stack, Generative AI, and RESTful APIs. Strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, with proven problem-solving skills through 340+ LeetCode problems and a 3-Star CodeChef rating.

Education

B.Tech in Computer Science and Engineering

SRM University AP

2024 – 2028

CGPA: 9.65/10.0

Intermediate

SR Junior College

2022 – 2024

97.9%

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, C, C++

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, WebSockets, JWT Authentication

Databases: MongoDB, PostgreSQL, MySQL

Cloud & Tools: Docker, AWS (Basics), Git, GitHub, Postman, Render, Vercel

AI: Generative AI, LLMs, Retrieval-Augmented Generation (RAG), LangGraph, LangFuse, AI Agents, Groq, Ollama

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Development Life Cycle, System Design

Experience

AI Product Engineering Intern – CCC Digital India Pvt. Ltd.

May 2026 – July 2026

- Developed LearnFlow AI in collaboration with cross-functional teams to deliver scalable AI-powered learning workflows.
- Designed and developed LangGraph-based AI agent workflows with LangFuse and RAG pipelines, optimizing backend services for reliable, context-aware applications.
- Researched and evaluated LLM frameworks, integrated Groq and Ollama with RESTful APIs, and optimized AI workflows for scalable, reliable applications.

Software Development Intern – NighaTech Global Pvt. Ltd.

May 2026 – Present

- Collaborated in an Agile development environment to build responsive web and mobile applications using React.js, React Native, Expo, and the MERN stack..
- Designed, developed, tested, and deployed scalable RESTful APIs, backend services, and database solutions while ensuring application reliability.
- Contributed to **EcoSmart**, an IoT-based smart waste management platform by implementing RBAC and real-time device monitoring features.

Projects

LearnFlow AI – AI-Powered Learning Workspace

Tech Stack: React.js, Node.js, Express.js, MongoDB, LangGraph, LangFuse, Groq, Ollama, Retrieval-Augmented Generation (RAG)

- Built a scalable AI-powered learning platform using Generative AI, LLMs, and Retrieval-Augmented Generation (RAG), enabling users to parse **60+ PDF documents** into interactive learning experiences.
- Designed and developed **4+ AI agent workflows** for contextual Q&A, quizzes, interview preparation, and personalized study plans, with the platform tested by **25+ users** during development.

BrandForge – Creator-Brand Collaboration Platform | [Live](#) | [Frontend](#) | [Backend](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a MERN-based creator-brand collaboration platform with JWT authentication, RESTful APIs, and role-based access control (RBAC).
- Developed **15+ RESTful APIs** and implemented database-driven business logic for scalable backend services.

Chatly – WebSocket-Powered Communication Platform | [Live](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io

- Built a real-time messaging platform with JWT authentication and WebSocket-based persistent chat.
- Implemented one-to-one and group messaging with event-driven communication supporting **multiple concurrent users**.

Achievements

- Solved 340+ LeetCode problems and achieved a 3-Star rating on CodeChef.
- Ranked Top 45 among 422 teams in the Smart India Hackathon (SIH) Internal Hackathon.
- Selected as a contributor for GirlScript Summer of Code (GSSoC) 2026, contributing to open-source projects using Git and GitHub.
