Professional Summary

Computer Science undergraduate (**CGPA: 9.65/10.0**) specializing in full-stack web architectures, mobile applications, backend API design, and AI-powered software systems. Proficient in **C++**, **JavaScript**, **React**, **Node.js**, **PostgreSQL**, and **Data Structures & Algorithms**, with proven experience architecting scalable, high-performance applications.

Education

B.Tech in Computer Science and Engineering

SRM University AP

2024 – 2028

CGPA: 9.65/10.0

Intermediate

SR Junior College

2022 – 2024

97.9%

Technical Skills

Programming Languages: C++, C, JavaScript (ES6+), Python, SQL

Frontend Development: React.js, React Native, Expo, Tailwind CSS, HTML5, CSS3, Vite

Backend Architecture: Node.js, Express.js, RESTful APIs, WebSockets, Better Auth, Swagger/OpenAPI

Database Systems: PostgreSQL, MongoDB, MySQL, PGVector

AI & LLM Orchestration: OpenAI API, Groq API, LangChain, LangGraph, Retrieval-Augmented Generation (RAG)

Developer Tools & Cloud: Git, GitHub, Postman, Vercel, Railway, Cloudinary

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS

Experience

AI Product Engineering Intern — CCC Digital India Pvt. Ltd.

May 2026 – Jul 2026

- Co-developed **LearnFlow AI**, a context-aware learning platform powered by the **MERN Stack** and **Generative AI**, enabling in-context AI explanations, mindmaps, quizzes, simulations, and automated note generation.
- Built and deployed 30+ AI backend endpoints leveraging **LangChain**, **LangGraph**, **Retrieval-Augmented Generation (RAG)**, and **Groq API** for ultra-fast, high-throughput LLM responses.
- Implemented **LangFuse** for end-to-end prompt observability, token usage tracking, and latency optimization; piloted the platform with 20+ beta users and presented the architecture to executive leadership.

Software Development Intern — NighaTech Global Pvt. Ltd.

Jun 2026 – Jul 2026

- Architected full-stack web and cross-platform mobile features using the **MERN Stack (MongoDB, Express.js, React.js, Node.js)**, **React Native**, and **Expo**.
- Engineered EcoSmart, an IoT-integrated environmental app utilizing QR code scanning workflows; built 30+ REST API endpoints and integrated caching mechanisms using **Redis** that significantly reduced data retrieval latency.
- Streamlined app performance through client-side code optimization and collaborative Agile workflows using Git, delivering scalable and production-ready code.

Projects

Nexora – AI-Powered Codebase Intelligence Platform | [Live](#) | [GitHub](#)

Technologies: React.js, Node.js, TypeScript, PostgreSQL, pgvector, RAG, LangGraph, Groq, GitHub OAuth

- Engineered an **AI-powered codebase intelligence platform** using AST-based analysis to extract symbols, imports, exports, routes, and inter-module relationships from GitHub repositories.
- Built a **semantic code retrieval pipeline** with **embeddings**, **PostgreSQL/pgvector**, and **RAG**, grounding with **LangGraph + Groq LLM** analysis in repository context to generate structured architecture, application flow, API, dependency, and onboarding insights.

Chatly – Real-Time Low-Latency Communication Platform | [Live](#) | [GitHub](#)

Technologies: React.js, Node.js, Express.js, WebRTC, Socket.io, WebSockets, MongoDB, C++

- Engineered a real-time communication platform integrating both **WebRTC audio rooms** and **WebSocket/Socket.io** messaging layers, driving high user engagement and positive beta feedback.
- Slashed end-to-end system latency and API overhead by **30%** through payload serialization, asynchronous socket event handling, and optimized database indexing.

LearnFlow AI – Context-Aware Learning Platform | [Live](#) | [Frontend](#) | [Backend](#)

Technologies: React.js, Node.js, Express.js, Python, RAG, LangChain, LangGraph, PGVector/MongoDB, REST APIs

- Architected an end-to-end distributed document ingestion and RAG pipeline processing **60+ unstructured documents** into high-dimensional vector embeddings for context-aware AI retrieval.
- Designed **8+ automated stateful graph workflows** using LangGraph and Groq API, optimizing context execution loops to deliver deterministic responses with sub-second latency.
- Deployed platform to **20+ active users** and integrated LangFuse for end-to-end prompt observability, token usage tracking, and multi-turn query execution efficiency.

Achievements

- Academic Excellence:** Ranked in the **Top 1%** of the Computer Science department for maintaining an exceptional **9.65 CGPA**.
- Smart India Hackathon (SIH) 2025:** Secured **Rank 22 out of 422 teams (Top 5%)** for designing scalable, high-availability system architecture.
- Competitive Programming:** Solved **450+ algorithmic problems** across LeetCode and CodeChef (**3-Star**), demonstrating advanced mastery of Data Structures, Dynamic Programming, and Graph Algorithms.
- Open Source Contribution:** Selected as an Open-Source Contributor for **GirlScript Summer of Code (GSSOC) 2026**, optimizing core application modules and merging peer-reviewed pull requests.
